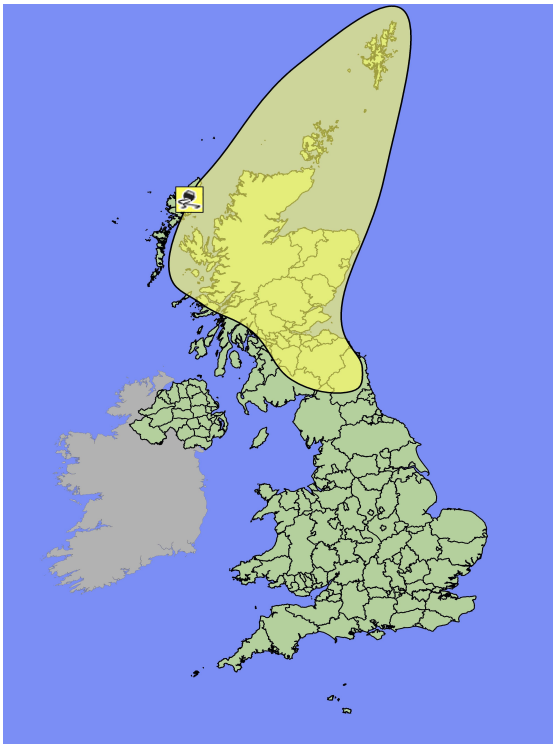
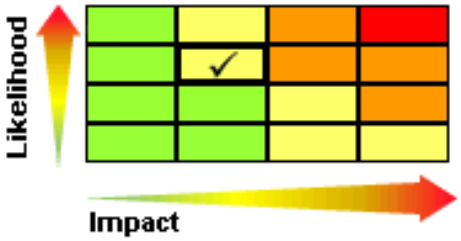
National Severe Weather Warning Service





Chief Forecasters Assessment
Another tricky winter's night, with low temperatures and some wintry precipitation to contend with. There are some uncertainties regarding cloud amounts, with a few areas perhaps staying mostly above zero.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **18:00 on Mon, 03rd Dec 2012** until **11:00 on Tue, 04th Dec 2012**

Temperatures will fall rapidly this evening where skies clear, with wet surfaces then readily freezing. The picture will be complicated by further areas of wintry precipitation in some areas.

The public should be aware of the likelihood of further difficult travel conditions, with icy stretches forming quite widely on untreated surfaces.
